Community Gates: Critical Decision Point

Current gate system is broken; residents pay fees for non-functioning gates. This situation is unsustainable.

Proposed options:

1

Eliminate Gates

- Removing all gates is proposed.
- Ending all gate fees is proposed.
- Assess community input.

2

Repair Existing System

- Evaluate feasibility.
- Likely costly, uncertain results.

3

Install New System

- Complete replacement is proposed.
- Obtain pricing quotes.
- Ensure long-term value.

Next steps:

- Propose a community input survey.
- Advocate for a technical assessment & cost analysis.
- Aim for a final decision this year.
