

A Community for Everyone

- A simple approach for the community is: Let's look at it from a "how would we want it if we started it now" and "what's the right thing to do for these issues and the members who live here."
- We have diverse residents, including year-round residents, those on fixed incomes, varying income levels, families, and retirees.
- We need a better way for everyone who lives here, and who wants to get involved, to participate.
- Everyone deserves a say and needs to feel welcome and that their ideas and concerns are heard.

I hope you will give these ideas some thought and thought and I would appreciate your support at support at the annual meeting.
